

UP 494-AG: Neighborhood Analysis

Week 1 Dossier

January 13, 2021

Weekly Description

- This week we will focus on understanding the structure and expectations of our learning community for the semester. We will introduce ourselves, and talk about our expectations for each other this semester.
- We will also draw upon our own observations to start to define the rationale for conducting neighborhood analysis, and the rationale for planning intervention at the neighborhood level.

Reflection Prompt

Each week, you will spend a few minutes reflecting on a prompt. For this week, please reflect upon the following questions. Before the end of the week, do some free writing around this question and come to class prepared to discuss your reflection. Submit your reflection in your assignment dropbox before Friday.

- What is a neighborhood? How should neighborhoods be defined? Why might neighborhoods be important units of analysis for city planners and urbanists?
- What characteristics make a place great?

Deliverables

- Please review the course syllabus and come prepared to ask questions on Tuesday 1/21
- Take the [course introductory survey](#) available online by Thursday 1/23
- [Register](#) for the optional but highly recommended Introduction to R for Urban Planners workshop (January 25th and January 31st) - registration closes on Wednesday 1/22

 - **April 30** - Neighborhood Wellness Concept Presentation at [City Hall](#) (tentative)
 - **May 8** - Your Final Neighborhood Wellness Concept Proposal due by 11:59pm

Preparing for Next Week

1. Download and install R and RStudio. You can find instructions in the Resources folder on Box.
2. Purchase Keiran Healy's book *Data Visualization: A Practical Introduction* from the online retailer of your choice or link to the [pre-print version](#) of the book available online (I have not compared the print version with the pre-print, and will be making reference to the print version over the course of the semester)
